

## Installing the (Beta) BudgetVM WHMCS Management Module

### Step 1.) Create a Server named "BudgetVM"

Name: BudgetVM

Hostname: api.budgetvm.com

IP Address: api.budgetvm.com

Type: Budgetvm

Username: {Your\_BudgetVM\_Client\_ID}

Password: {Your\_BudgetVM\_API\_KEY} \* Request from support if you do not have this.

\*\* Reseller's can generate an API Key here: <https://portal.budgetvm.com/reseller/api>

### Step 2.) Create a Server Group named "BudgetVM"

Add the server we created named "BudgetVM" to the BudgetVM Server Group

### Step 3.) Add a custom field to the service in your WHMCS named "BudgetVM Service ID" that is Admin Only

### Step 4.) Goto the product in your clients profile and enter the associated BudgetVM Service ID in the Field called "BudgetVM Service ID"

## Servers

[Help](#)

This is where you configure all your servers so that WHMCS can communicate with them. The default server for each module is marked with an asterisk \*. You must select a default server for automatic setup to function correctly.

Options: [Add New Server](#) | [Create New Group](#)

Server Name	IP Address	Active Accounts	% Usage		Status	
<b>Budgetvm</b>						
<a href="#">BudgetVM</a> *	api.budgetvm.com	0/200	0%	<a href="#">Login to Control Panel</a>		

## Groups

Server groups allow you to configure sets of servers to assign products to and have new orders rotate around servers within that group or fill until full.

Group Name	Fill Type	Servers	
BudgetVM	Add to the least full server	BudgetVM	

## Servers

### Edit Server

Name	BudgetVM
Hostname	api.budgetvm.com
IP Address	api.budgetvm.com
Assigned IP Addresses (One per line)	
Monthly Cost	0.00
